**ALX Software Engineering Modules** — *Linux, Git/GitHub, Shell Tools, and Scripting, Editors (Vim), Bit Manipulation, Memory Management, Data Structure and Algorithms, Python, Object Oriented Programming, Web Scraping, Databases, System Engineering, Fullstack Project, DevOps.*

## PROFESSIONAL SUMMARY

Motivated Software Engineer with an exceptional educational background in computer science and technology. Proficient in essential software engineering skills, including front-end development and network architecture.

Willing to learn and develop better as a full-stack developer as I'm not solid with back-end developments.
